CAREER OBJECTIVE

Results-driven Data & Business Intelligence Professional and final-year BCA student with a strong foundation in SQL, Power BI, and Advanced Excel. Passionate about bridging the gap between complex data and actionable decision-making. Proven ability to handle end-to-end data lifecycles—from extracting messy datasets to creating impactful visual stories that drive business growth.

TECHNICAL SKILLS

- Data Visualization: Power BI (Advanced DAX, Power Query, Data Modeling), Excel Dashboards.
- Databases & SQL: SQL Server, PostgreSQL, MySQL (Proficient in Joins, CTEs, Window Functions).
- Analytical Skills: Data Cleaning, Trend Analysis, RFM Modeling, Time-Series Analysis.
- Reporting & MIS: Advanced Excel (Pivot Tables, VLOOKUP/XLOOKUP), Automated Reporting.

EXPERIENCE & CERTIFICATION

Deloitte Australia – Data Analytics Job Simulation | Forage | View Certificate — Dec 2025

- Completed a virtual job simulation focused on data analysis and forensic technology, mimicking real-world consultant tasks at Deloitte.
- Analyzed complex datasets to identify patterns and anomalies, supporting high-stakes business and forensic investigations.
- Demonstrated proficiency in translating raw data into actionable insights for strategic decision-making.

PROJECT

1. End-to-End Retail Analytics | SQL + Power BI | View Project

- Designed a robust relational database schema with 6 tables (Customers, Orders, Returns, etc.).
- Executed 25+ advanced SQL queries using CTEs and Window Functions (LAG, NTILE, DENSE_RANK) for complex business problems.
- Developed a Power BI dashboard to monitor Customer Lifetime Value (CLV), Inventory Turnover, and Revenue at Risk.
- Key Achievement: Created an RFM model to segment customers and identified loss-making products using profit-margin analysis.

2. Financial Market Analysis: Suzlon Energy (2021–2026) | Power BI | View Project

- Developed an end-to-end Power BI dashboard analyzing 1,200+ daily trading sessions to track long-term price movements and liquidity trends.
- Engineered ETL Workflows in Power Query to ingest, clean, and transform raw multi-year CSV datasets into a structured, analysis-ready data model.
- Designed Advanced DAX Measures to calculate Year-over-Year (YoY) performance, 52-week High/Low benchmarks, and volatility trends.
- Built Interactive Visualizations to correlate volume surges with price breakouts, effectively communicating the 2023 market turnaround story.
- Tech Stack: Power BI, Power Query, DAX, Data Modeling.

3. E-Commerce Sales And Profitability Analysis | Advanced Excel | View Project

- Processed a dataset of 31,000+ rows to analyze sales performance across Indian states and sales channels (Amazon, Myntra, Flipkart).
- Built a comprehensive dashboard using Pivot Tables and Slicers to track Order Status (Delivered vs. Cancelled) and Category-wise Profitability.
- Insight: Identified that the Women's Kurta segment was the primary revenue driver, contributing to over 60% of total sales.

EDUCATION

- Sarala Birla University, Ranchi | Bachelor of Computer Applications (BCA) | Current CGPA: 8.0/10 (Up to 5th Semester)
